

Cover your employees and decrease absences from work

What is working capacity insurance?

The insurance supplements statutory occupational health care provided by LocalTapiola's partner. The insurance includes specialist physician examinations and treatment of the personnel. This insurance covers medical treatment expenses of illnesses, diseases and accidents when treatment is sought as instructed by LocalTapiola.

Benefits for employers and employees

Working capacity insurance helps companies to manage personnel expenses. Timely, high-quality care can reduce employee absence times due to illness and accidents that occur during leisure time.

What is covered by working capacity insurance?

Working capacity insurance can be used to construct appropriate insurance cover for companies. The insurance always includes cover for general practitioner treatment expenses. The policyholder may choose to include specialist physician treatment expenses cover in the insurance and, if this is chosen, there are the additional options of cover for pharmaceutical expenses, physiotherapy and other therapy.

Cover for general practitioner treatment expenses provides compensation for

- General practitioners' fees and examinations prescribed by them
- Daily hospital charges
- Charges for public outpatient clinics and health centres

Cover for specialist physician treatment expenses provides compensation for

- Specialist physicians' fees and examinations prescribed by them
- Surgical expenses
- Daily hospital charges
- The costs of physiotherapy following surgery or casting

Pharmaceutical expenses cover provides compensation for the cost of medical preparations required in the event of illnesses and accidents.

Physiotherapy cover provides compensation for expenses arising from physiotherapy, naprapathy and chiropractics due to an illness or accident. Insured parties can receive compensation for up to 10 sessions of treatment during the insurance period.

Therapy cover provides compensation for the cost of therapy required due to illness or accident:

- Psychotherapy
- Neuropsychological rehabilitation
- Occupational therapy and speech therapy

Therapy expenses are paid for a maximum of 25 treatment sessions per form of therapy per insured person for the entire period of validity of the insurance contract.

What is not covered by working capacity insurance?

The insurance does not cover health-related check-ups, vision tests, preventive health care, dental treatment, treatment or pharmaceuticals primarily intended to improve quality of life, cosmetic procedures or complications arising from such procedures. If the insurance includes only general practitioner medical treatment expenses cover, special health care examinations and treatments, e.g. MRI studies and operations, are not considered compensable treatments. The exclusions for each type of cover are described in detail in the terms and conditions of insurance.

Regarding the same illness or accident suffered by the insured, the forms of cover included in the insurance can provide combined compensation for expenses up to a maximum of EUR 10,000. The policyholder can select the deductible.

Where and when is working capacity insurance valid?

The insurance is valid worldwide at all times: at work and during leisure time. However, compensation is only paid for expenses arising from treatment and examinations that were conducted and prescribed in Finland.

Granting of insurance

Working capacity insurance is intended for companies with at least 10 people. Health declarations are not required in order to take out the insurance so all employees will receive the same cover providing that they are aged between 15 and 80 and they fall within the scope of occupational health care. It does not matter whether employees have prior illnesses. Insured employees must have a valid Kela card and must be permanently resident in Finland.

The insurance will be granted and will remain in force on the provision that the company has a valid statutory occupational accident insurance policy granted by LocalTapiola and a statutory occupational health care agreement with LocalTapiola's partner.

How are premiums determined?

The premium is determined on the basis of the policyholder's business sector and the age, gender and number of insured personnel. The age of the insured affects the premiums every year. The premium is also dependent on claims expenses and an index to which the insurance is tied.

Claims expenses (the claims ratio) affect the premium from the second or third insurance period onwards. A multiplier based on the claims ratio can increase the premium for the next insurance period by up to 40% and decrease it by up to 20%.

Claims ratio	Coefficient
max 20 %	0,80
30 %	0,84
40 %	0,88
50 %	0,92
60 %	0,96
70 %	1,00
80 %	1,06
90 %	1,12
100 %	1,18
110 %	1,24
120 %	1,30
130 %	1,36
140 %	1,40
150 %	1,40

Information on taxation

Premiums are usually tax-deductible for the company. In accordance with the guidelines issued by the Finnish Tax Administration, the taxability of the benefit received from the insurance must always be assessed case by case. Working capacity insurance can be used as a tax-free employee benefit, provided that the benefit is ordinary and reasonable, and the insurance has been taken out to cover the entire personnel with the same content for all employees. Exemption from tax also requires that the compensation for treatment expenses is a maximum of EUR 10,000 per illness or accident. In addition, the average employee-specific premium shall be reasonable (an average annual premium exceeding EUR 1,000 is not considered reasonable).

Additional information is available in Finnish as part of the detailed tax guidelines on the vero.fi website: Työnantajan ottaman sairausku-luvakuutuksen verotus 29.5.2017, A85/200/2017. LocalTapiola is not liable for the taxation of the policyholder or the insured or for amendments to tax regulations or legal or authority practices.
